

Suggestions for connecting multiple antennas to multiple rigs utilizing Model DELTA4-B (4 position) coax antenna switches. Antenna types and rigs are samples from a customer request. Model DELTA-2B (2 position) switches can be used for lesser antenna/rig requirements.

HF ant    VHF/UHF    to COM on SW 2    loop ant    scanner antenna

SWITCH 1

IC7000    KX-3    scanner

SWITCH 2

As an example of the operation, if you placed switch 1 in position 1 and switch 2 in position 1, the "HF antenna" would be routed through to the "IC 7000".

Note the "COM" connector on switch 1 is routed to the "COM" connector on switch 2 with a jumper coax. Then, both switches have complete versatility for multiple rigs and multiple antennas.

All prices plus shipping/handling. **888-302-8777**.
