

**Advanced Grounding and Surge Protection Techniques for Antenna and Tower Systems. Another Product Innovation from Alpha Delta Communications, Inc. to Enhance Your Station Protection!!**

**Model TLM Tower Leg Mount.** Good engineering practice dictates that all towers should be well grounded at the base and coax cables leaving the tower should also have their shields grounded at this point. Now this can be done easily and quickly with the Model TLM Tower Leg Mount.

The beautiful stainless steel bracket is precision laser cut and provides a solid grounding and mounting platform for up to 4 Alpha Delta Model ATT/TT3G50 series surge protectors. The bracket is pre-drilled and the surge protectors mount with their included hardware. See photo. Bracket hardware is also stainless steel.

The Model TLM comes with a copper ground lug and hardware to connect your tower to a ground rod. Handles wires sizes from #4 to #14. See photo.

Fits all round tower legs or masts from 1 in. to 2 in. dia. like Rohn 20G, 25G, 45G, 55

Price U.S. \$69.95 ea. plus S/H, including SS bracket hardware. Or, see your Alpha Delta dealer.

All prices plus shipping/handling. **606-598-2029.**
